## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, and 11-13, drawn to transmit data and voice signals over telephone lines, classified in class 379, subclass 93.05.
  - II. Claims 6-10, and 14-18, drawn to cancel the near end echo from data and voice band signals in communication medium, classified in class 379, subclass 406.01.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention I is concerned with the transmitting data and voice signals over telephone lines. The subcombination has separate utility such as the invention II describes the method for canceling the near end echo signals from data and voice band signals in the communication medium.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
